ECO BUTYNOL®

A Complete System for Solvent Free Waterproofing

SOLVENT FREE WATERPROOFING MEMBRANE SYSTEM

BECAUSE HEALTH MATTERS

ARDEX WPM09A & ARDEX WPM09C are completely solvent free - reduces the risk of potentially harmful solvented adhesives.

REDUCE LAYING TIME

Using ARDEX WPM 09 enhances the adhesion process. By using ARDEX WPM09A (Adhesive) & ARDEX WPM09C (Catalyst) at the same time, the Eco Butynol® will be ready to lay almost immediately.

ENHANCED PERFORMANCE IN VARIABLE CONDITIONS

When temperature/humidity is not ideal, use ARDEX WPM09C (Catalyst) to enhance the adhesion process.

LOW VOCs - IDEAL FOR GREEN BUILDING PROJECTS

The low VOCs in the ARDEX solvent free waterproofing membrane system means that the requirements for Green Building projects are met.

SOLVENT FREE The adhesive and catalyst are solvent free. The Seam Tape and Primer used for the joints uses a minimal amount of solvent.

COST EFFECTIVE Reduce the square metre application rate because the coverage per litre is higher than solvent based systems.

TRAINING & SUPPORT Only fully trained ARDEX approved applicators can install Eco Butynol®. Be assured that the experienced ARDEX team offers on-going support.

EASE OF APPLICATION With the Graco 390 Air-Assisted Sprayer, a roof can be completed easily and quickly by one person. Spraying on the adhesive is quick and harmless to the applicator and the environment.

CONSISTENT QUALITY ARDEX Butynol® is a product that you can rely on for superb water protection over a long lifespan. Eco Butynol® carries all the same strength and waterproofing benefits as standard Butynol®.

ECO BUTYNOL®: Fibre-backed Butyl rubber membrane system

- A fully exposed single ply roofing membrane
- Adhered only with solvent free adhesive, ARDEX WPM 09A
- All the strength and waterproofing benefits of standard Butynol®
- Includes a unique filament base layer that allows for simple adhesion

ARDEX WPM 09A: Solvent Free Adhesive

- No harmful fumes or potential side effects
- Environmentally friendly and non polluting - Low VOCs
- Spray on application with a unique GRACO sprayer
- High coverage rate with reduced cost/m²

ARDEX WPM 09C: Catalyst

- Solvent Free
- Use in conjunction with ARDEX WPM 09A
- Speeds up laying of Eco Butynol® in adverse conditions
- Improves bond; creates instant grab

GRACO 390 Air-Assisted Sprayer: Dual spraying capacity

- Top of the line adhesive sprayer specifically modified for the application of WPM 09A (Adhesive) & WPM 09C (Catalyst)
- Only available through ARDEX New Zealand Ltd
- Simple to use, application times are improved
- Improves even distribution of adhesives

Seam Primer and Seam Tape are also used as part of the Eco Butynol® system to ensure laps are securely sealed.
